# ABOUT US...

Trendy Mirrors has a wealth of experience spanning three generations of Thom family mirror manufacturers producing quality New Zealand made mirrors and splash backs.

When William Thom Senior pioneered mirror silvering in New Zealand back in 1938, his aim was quality, affordability and service. At Trendy Mirrors we pride ourselves on these core values subsequently only producing lasting quality at a realistic price.

At our manufacturing plant in the heart of Christchurch we produce several ranges of high quality mirrors and splash backs. We pride ourselves on our ability to custom size and make to order.

## OUR RANGES

### DECORATIVE MIRRORS AND FURNITURE

Our ornate frame designs originate from Italy, Spain, France and England reflecting elegance and the latest designs. The frames are solid timber which uses a biscuit technique to ensure the timber stays true and straight for a ripple free reflection. Complete with beveled edges to add a further touch of style and give the framing depth.

The Platinum Collection introduces contemporary glass on glass mirror designs. These stunning frameless mirrors bring light and depth to any room.

Discover our Mirrorturè furniture, crafted with great care using solid and modern warp free materials for lasting quality. Mirror furniture brightens up any room and makes small rooms seem bigger, all while adding style.

See the back page of this catalogue for our in-home design tips.

### MIRROX® BATHROOM MIRRORS

Our Mirrox® new generation bathroom mirrors were the first choice from results of salt testing which proved the mirrors to be superior in resistance to corrosive elements and moisture. Without the use of copper or lead in the production stage our mirrors are the environmentally friendly choice.

Safety vinyl backing is optional on all our mirrors and is recommended for high-risk human impact areas such as the bathroom. If the mirror is broken the adhesive vinyl will ensure fragments stay together significantly reducing the risk of injury.

Our Clear View electric heat pads can be installed on many of our bathroom mirrors for a mist-free mirror. These make a great addition to any bathroom. A variety of low-wattage pads are available for fitting to the back of the mirror, these are permanently hard-wired in and switch off and on with your light switch meaning no thermostats or transformers are required for normal home use.

### SPLASH BACKS

Our glass splash backs offer a stunning feature for your home. Durable, heat resistant, and easy to clean, all our splash backs use toughened safety glass, in accordance with NZ safety standards. We offer a variety of standard sizes and with the ability to custom size we can make our splash backs to fit almost any place where tiles may have been used previously. Perfect for the Kitchen, Bathroom and Laundry with 13 standard colours in our range or you can choose any Resene or Dulux colour to compliment your décor.

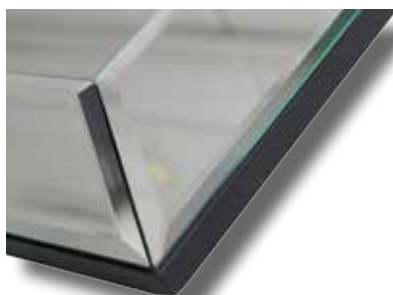

### PRODUCT DISCLAIMER

The photos in this brochure are provided to assist you in making a choice of mirror and to provide you with an idea of Trendy Mirrors' range of decorative mirrors.

Colour in the photos may vary from the actual mirrors due to the capability and reproduction limitations of photography and printing. There are also colour variations from batch to batch of framing received by Trendy Mirrors.

All sizing is approximate and sizing may vary from batch to batch. For exact size on the latest batch please contact the manufacturer.

By purchasing this product, you agree with this disclaimer. Trendy Mirrors Ltd. All rights reserved 2013.

JB-16X12

BLACK VENETIAN  
HAND HELD MIRROR

255H x 140W x 10D mm

H - 113

## IN HOME DESIGN TIPS

Mirrors can be used in every room. They are conversation pieces and works of art. They reflect light and create new dimensions in a space. Or they can be subtly incorporated into the design of a room to enhance the total look of the home.

Mirrors in any area of your home will reflect light and add a perception of space. A well placed mirror can open up a room, alter a view or reflect a little personality.

Try a large contemporary mirror as a feature on a wall. The mirror becomes a focal point in the space, a piece of art that reflects a beautiful view or the seasonal changes, visually expanding your indoor space and creating indoor outdoor flow.

A large mirror in a small room will create the illusion of depth. We suggest placing a big mirror on the wall above a dining room table to reflect the lighting, or installing a mirror across from a beloved piece of artwork.

A Mirror is also a must in the entrance of your home as it offers a feeling of being welcomed. It will also act to widen the space creating a better flow from room to room.

## CONSIDERATIONS WHEN CHOOSING A MIRROR

For darker and smaller areas use a large mirror to add light and perception of space.

Try placing the mirror across from a window to add the illusion of another window in the room.

For a general size check try cutting some newspaper to size and holding it against the wall.

Consider whether to hang the mirror vertically or horizontally as each will give a different effect.

**All our mirrors are able to be hung both landscape and portrait.**

Consider the size, shape and style of the mirror as well as its placement within the space. In some places it may be appropriate to use multiple mirrors.

Remember if done correctly, mirrors become more than something that you merely look into but something that you actually want to look at.
