Styline® MIRRORS

About Us

Styline mirror is an exclusive brand produced by Trendy Mirrors Ltd. Trendy mirrors has a wealth of experience spanning three generations of Thom family mirror manufacturers producing quality New Zealand mirrors. William Thom senior pioneered mirror silvering in New Zealand back in 1938, his aim was quality, affordability and service. This is the core of Trendy Mirrors business and subsequently we only produce lasting quality at a realistic price with expedient delivery.

We produce a range of high quality Bathroom mirrors. This is essential if the mirror is to last in typical conditions.

Through salt testing Styline mirrors were chosen on their superior resistance to corrosive elements and moisture, this

is backed up with a 2 year replacement guarantee. The mirror is ripple free giving it a true reflection without unsightly distortion and many designs can be cut to size in our factory in Christchurch.

Our designs cover every conceivable shape and type: mirror tiles, rectangular, circular, oval, triangular or arched; with polished, beveled, sandblasted edges or framed to your choice. You'll love the adaptability of our mirror tiles.

Custom sizing, made to order.

For those fogged-up bathroom mirrors, electric demist pads are available on many types, leaving a clean and mist free surface.

Choosing a Mirror to suit your bathroom or living area

Mirrors in a bathroom or living area reflect light and can add light to dark areas. Larger mirrors add a perception of space.

Size

- For darker and smaller areas use a large mirror to add light and perception of space.
- For a general size check try cutting some newspaper to size and hold against the wall.
- For size symmetry, check vanity width, window framing or shower height for alignment.
- Vertical and horizontal mirrors both give a different effect
- For a full height mirror measure up from the basin 150mm - 200mm & add sufficient height to accommodate all members of your household, normally about 900-1000mm is sufficient.

Double Basins

For double basins use the two individual heated mirrors for a contemporary finish. However if you want to increase natural lighting and the perception of space one long larger mirror is our recommendation.

Style

Choose a mirror from our extensive range to suit your personality, style and existing decor.

A bevel edge adds a touch of elegance to any room, glass or timber frames add colour and depth. Frosted edge mirrors give a bathroom a sleek modern finish. Shaped mirrors add character & balance, especially suited to a pedestal vanity and a bathroom with square lines. For the Villa or for the contemporary bathroom we have a range of modern glass on glass mirrors (sectional bevel range) and traditional mirrors in our ornate brochure or website.

Choosing the fixing type for your frameless mirror

For flush wall fit > holes & domes, orbs or glue fix

For a minimal finish > hidden fixings

For use with demist pad > hidden fixings, holes and domes, orbs or clips (glue not recommended)

Lighted Mirrors

We recommend vertical side lights for the best light reflection and effect.
