CELEBRATING MIRROR
PERFECTION SINCE 1985

TGM

The Kiwi Glass Company manufacturing New Zealand Glass & Mirrors since 1985.

CHECK OUT
SOME OF OUR
KEY FEATURES

Trendy Glass and Mirrors has a wealth of glass manufacturing experience spanning three generations of Thom family glass manufacturers. Back in 1938 William Thom senior was a pioneer of mirror silvering in New Zealand. His focus was high quality, affordability and service. This is the core of Trendy Mirrors business and subsequently we only produce lasting quality at a realistic price.

“Our focus is on quality!” Damien Thom, Managing Director, TGM

We produce a range of high quality bathroom mirrors utilizing a new generation of superior mirror. This is essential for the mirror to withstand typical moist bathroom conditions.

Quality is taken seriously; in our Christchurch factory mirror is sample tested using our accelerated weather testing machine. Fine mist containing salt is sprayed on the mirror and other materials allowing us to determine the effects of 5 to 10 years of ageing.

5

MirroX® NEW GENERATION copper-free mirror is our highest grade & most durable mirror, it comes with a 5 year manufacture replacement warranty. 3 year warranty for LED mirrors & 2 year for glue fix mirrors.

The mirror backing paint is of the highest quality and twin coated providing long lasting durability and protection.

Exposed silver edges are sealed providing further protection from moisture and desilvering.

◆ **Precision®** 3

Precision® copper-free mirror is a high quality bathroom mirror that comes with a 3 year manufacture replacement warranty. A quality mirror at a good price. Exposed silver edges are sealed providing further protection from moisture and desilvering.

LED surround lighting is designed to add extra illumination to your bathroom with soothing effect and increase practical lighting for those close-up applications.

ECOLOGICAL COPPER-FREE

Our **MirroX®** mirror contains no copper and lead which is ecologically friendly and is proven superior in corrosion resistance comparative to other mirrors and traditional silver mirror.

Safety vinyl consists of a laminate film adhered to the back of the mirror to reduce the likelihood of serious injuries through human impact. Additionally the laminate prolongs the life of the mirror by providing an additional layer of protection against moisture.

We love custom-made! Our custom design factory can make almost every conceivable shape of glass and mirror. We love a challenge, please ask us and we will make it.

- + **Ultra Clear, Framed, Unframed and LED Light Mirrors** for Commercial and Residential use.
- + **Frameless glass showers, kitchen splash backs and glass balustrades** are made in house using a tempering furnace which creates toughened safety glass.
- + Our **Clearview Mirror Demisters** are a great addition for a fog free mirror and increased mirror life.

YEARS
CELEBRATING MIRROR
PERFECTION SINCE 1985

BATHROOM MIRROR DEMISTER FOG-FREE ELECTRIC HEAT PAD

Clearview mirror demisters are easy to attach to the back of the mirror with a self adhesive peel or for convenience we can pre-attach at the time of mirror purchase (on request).

By wiring into the light switch every time you finish your shower the surface area of the demister will be warmed, fog free and ready to use. Not only does it prolong the mirror life it also stays much cleaner by removing the need to wipe the glass.

A small luxury you will not regret.
